|   | ▶ APPLICATION                | ✓ Commercial operator | ■ Local authority | PROFILE |
|   | Leaf/light debris clearing   |                       |                   |         |

| FEATURES                        | BENEFITS   |
|---------------------------------|--|
| Premium grade ECHO engine       | Improved power-to-weight ratio / extended product life   |
|                                 | More powerful than an electric blower  |
| Posi-loc™ pipe system           | ✓ Keeps the blower pipe sections securely connected at all times   |
| EZ lock pipe connection         | The locking latch makes connecting/disconnecting the pipe to the machine easy and also ensures a secure connection |
| Double debris guard             | Reduces intake clogging and provides more consistent unit performance  |
| Rotational control design       | ✓ Reduces gyro effect on wrist for user comfort and reduced fatigue  |
| Tool-less air filter cover      | ✓ For easy maintenance, even when wearing gloves   |
| Throttle with cruise control    | ✓ Allows operator to lock throttle at a variety of settings  |
| Harness attachment points       | ✓ Shoulder harness can be used to support weight of unit   |
| See-through fuel tank           | Easy to check the level of fuel in the tank  |
| Stage 2 low emissions compliant | ✓ Reduced exhaust emissions  |
| Grouped controls                | Controls are close together making the blower easy to use  |

| Engine<br>Displacement | Dry Weight* <sup>1</sup> | Output | Fuel Tank<br>Capacity | Nozzle Type    | Air Volume* <sup>2</sup> | Max Air Speed* <sup>2</sup> |
|------------------------|--------------------------|--------|-----------------------|----------------|--------------------------|-----------------------------|
| 25.4cc                 | 3.9kg                    | 0.9kW  | 0.54 litres           | Round straight | 768m³/h                  | 76.2m/sec                   |

<sup>\*1:</sup> Unit with round straight pipe, empty tank \*2: Measured in accordance with ANSI/OPEI B175.2.

## **EXTENSIVE WARRANTY**

ECHO power tools come with a **five year domestic warranty** or a **two year warranty** in professional use. For the domestic user there is the total reassurance of using equipment designed and built for professionals, and a five year warranty offers even greater peace of mind (Registration of ECHO products and servicing are necessary to validate the warranty)
